

HEIDENREICH INNOVATIONS LAUNCHES OFFICER MATRIX COMPLIANCE MODULE

Greenwich, CT – 5 July, 2011 - Heidenreich Innovations LLC announced today the launch of a new Officer Matrix Compliance module on www.Q88.com.

The new Officer Matrix Compliance module can be used by ship owners to track the experience of the officers on board and it performs an analysis the officers' experience to see if they meet the requirements of over twenty oil companies and charterers. The module also supports integration with internal crew management systems and submission of the Officer Matrix data to OCIMF.

Fritz Heidenreich, President of Heidenreich Innovations, said, "We are really excited about our new Officer Matrix module, the system automates the completion of the Officer Matrix data by allowing the vessels to complete them onboard thus streamlining the entire process. The system also automatically recalculates the officers experience while on board and notifies you when updates to OCIMF are required or if the vessels' compliance with oil major requirements changes".

About Heidenreich Innovations

Heidenreich Innovations, through its offices in the United States and Singapore, operate the www.Q88.com and www.Baltic99.com websites which serve the tanker and dry bulk industries. There are currently 700+ questionnaires available on these websites and are being used by over 500 ship owners and technical operators, representing 7,000 vessels.

Heidenreich Innovations also offers software solutions for chemical tanker owners. www.Milbros.com is a web-based system containing details on over 10,000 chemical cargoes. It is continuously updated with new regulatory and safety information and is essential for ship operators today.

Company headquarters are located in Greenwich, Connecticut, USA. For more information, visit www.Q88.com or call +1 (203) 413-2030.
