FOR IMMEDIATE RELEASE March 6, 2014

Cargill Signs Agreement for Q88Dry.com

Q88 LLC is pleased to announce that Cargill International SA has signed an agreement to use the Q88Dry.com platform. The agreement will allow Cargill to efficiently manage the certificates, vessel descriptions and forms for their time charter fleet.

Fritz Heidenreich, President, said, "We are proud to have Cargill, the world's largest grain trader and the largest privately held corporation, join our service for their commercial and operational needs. The Q88Dry.com platform will allow Cargill to efficiently maintain and share all vessel documents and information, in a secure online environment with the ship owners that they do business. We have tripled our customer base in the last 12 months and, with the addition of Cargill, the expansion of the Q88Dry.com platform will continue at an even faster pace."

Over 1,000 vessels are currently registered on Q88Dry.com, including vessels operated by Pacific Basin, Lauritzen Bulklers, Bocimar and Golden Ocean.

Q88Dry.com is a web-based platform for storing documents and vessel information. By providing a centralized platform for owners and operators to access and manage vessel data, Q88Dry.com significantly increases the efficiency and accuracy of maintaining this information.

About Q88 LLC

Q88 LLC, through its offices in the United States and Singapore, operates the www.Q88.com and www.Q88Dry.com websites which serve the tanker and dry bulk industries. There are over 1,000 companies with an aggregate fleet of 8,000 vessels using our services.

Q88 LLC also offers Milbros software, a solution for product and parcel tanker owners. This is available via the web or PC install and contains details on over 11,800 Annex I and II cargoes. It is continuously updated with new regulatory and safety information making Milbros an essential tool for today's ship operators.

Company headquarters is located in Stamford, Connecticut, USA.
