Q88 and DNV GL Complete Navigator Port Integration

Stamford – 25 June 2019 – Q88 LLC announced today the completion of a project with DNV GL’s Navigator Port solution. The integration allows mutual customers to publish vessel certificates captured from Navigator Port into the Q88 and Q88Dry platforms. This information is linked to Q88’s database of 1,400 industry and charterers questionnaires.

“Automating the exchange of information between Navigator Port and Q88 and Q88Dry will significantly reduce time spent manually completing certificates and questionnaires,” said Fritz Heidenreich, Founder and President of Q88 LLC. “We are very excited to help our clients streamline their vetting and commercial processes.”

“We are excited about extending our integration between Navigator Port and Q88. The certificate integration further reduces the administrative burden of reporting for the crew. We look forward to distributing this new feature to our customers and their more than 3.000 vessels with Navigator Port,” says Rune Lyngaas, Head of Product Management for Maritime Software, DNV GL.

About Q88 LLC

Founded in 2001, Q88 LLC is the leading SaaS technology provider to the maritime industry. Our products have revolutionized the global shipping industry by connecting companies and facilitating the sharing of information efficiently and productively. Our partnership with the world’s leading ship owners, charterers, ship managers, agents and brokers has provided us insight into how to build solutions for some of the industry’s most pressing issues.
